

FEDERATION OF CUBAN WOMEN

Solidarity Message with the Palestinian people and its women, condemning the israelí attacks.

Dear sisters,

We, Cuban women rise our voices and join all progressive forces of the world to condemn the violent actions of the Zionist government of Israel against the Palestinian people, whose main victims are women, children and elderly people.

Once again, the Palestinian people suffer the violation of its international right to sovereignty and self-determination, of the norms of the humanitarian law, including the civilians protection in war time that figures in the Geneva Convention, adopted August 12th, 1949.

Facing the impunity of the military Zionist operations in the Gaza Strip, and the absence of an overwhelming answer from the Security Council of the United Nations; it is our moral duty to unite ourselves to the call of the International Community in demanding the immediate ceasing of this aggression, and to put an end to this crisis, to support and to promote the peace process and the respect to the international law and the legitimate rights of the Palestinian people.

We ratify our commitment to struggle together with all women of the world against war, in favor of peace, justice and freedom.

(Mensaje de la FMC solidaridad con Palestina, 9 Jan 2009)
